Mint of the United States at Philadelphia,

29th May, 1888

Dear Sir

In answer to the letter of the Secty of the Galeana Gold & Silver mining Co. I would respectfully state that according to law Bullion unsuitable for comage can be refused. These bars were dirty & brittle and contained base metals. that made them to require Toughening which cost the mint more than the mint is allowed to charge and is therefore an Expense to the government. All the brittle base metals should be worked off and the bars be tough & clean then there would be no objections to receiving them

Very Respectfully
H. S. Cochran
Weigh clerk

W. H. Dandridge Esq
Supt of U.S. Mint Phila
